

In [1]:

```
# Write a python program to check the given number is even or odd using if-else construct.
```

In [5]:

```
num = int(input('Enter the number: '))
```

Enter the number: 55

In [6]:

```
if num%2 == 0:  
    print(f'{num} is even')  
else:  
    print(f'{num} is odd')
```

55 is odd
