In [1]:

```python
# Write a python program to check the given number is positive, negative or zero using if-e
```

In [2]:

```python
num = int(input('Enter the number: '))
```

Enter the number: 5

In [3]:

```python
if num>0:
    print(f'{num} is positive')
elif num<0:
    print(f'{num} is negative')
else:
    print(f'{num} is zero')
```

5 is positive
