In [1]:

```python
# Write a python program to perform arithmetic operations.
```

In [2]:

```python
n1 = int(input('Enter the 1st number: '))
```

Enter the 1st number: 5

In [3]:

```python
n2 = int(input('Enter the 2nd number: '))
```

Enter the 2nd number: 6

In [9]:

```python
print(f'Addition: {n1} + {n2}: {n1+n2}')
print(f'Subtraction: {n1} - {n2}: {n1-n2}')
print(f'Multiplication: {n1} * {n2}: {n1*n2}')
div = n1/n2
print(f'Division: {n1} / {n2}: {round(div,3)}')
```

```
Addition: 5 + 6: 11
Subtraction: 5 - 6: -1
Multiplication: 5 * 6: 30
Division: 5 / 6: 0.833
```
